

Energy Management Obligations in 2021

In 2021 NORA met its Public Body Energy Management obligations set out in [S.I. No. 426/2014 - European Union\(Energy Efficiency\) Regulations 2014](#)

NORA continues to pursue its energy saving targets through participation in SEAI's system for Energy Monitoring and Reporting.

Overview of Energy Usage in 2021

NORA's main energy use in 2021 was as follows:

NORA's office buildings – 21.6 MWh were consumed at a carbon emission total of 7,724 kg.

Ringsend terminal – 22.8 MWh were consumed at a carbon emission of 8,151 kg.

Tarbert terminal – 56.3 MWh were consumed with a total carbon emissions of 20,127 kg.

Poolbeg terminal – 69.2 MWh were consumed with a total carbon emission of 24,753 kg.

Energy Management Actions in 2021

- NORA's Energy consumption was higher in 2021 due to Poolbeg terminal being operational for a full 12 months. NORA energy performance was 49 % better than energy efficiency baseline target.
- Onsite Energy generated from renewable sources (Tarbert Solar Panels) in 2021 was 9.2 MWh.
- Ongoing commitment to SEAI energy M&R programme in working towards achieving a 50% improvement in energy efficiency by 2030.
